 Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Response to Arguments

1. In view of the Appeal filed on 02/07/2005, PROSECUTION IS HEREBY REOPENED.

A new rejection is set forth below with newly found art.

Claim Rejections - 35 USC § 101

2. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 1-49 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. The use of terminology such as "a wireless transponder, fixed to the object" inferentially claims the human body. The Examiner suggests use of terminology such as "adapted to be fixed" to overcome this rejection

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 1-49 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ishiwawa et al.'448 (US Patent NO. 6,447,448).

Ishiwawa et al.'448 teach all the elements of the current invention including a wireless transponder having at least one sensor coil, a control circuit and a power coil so arranged so as to

Art Unit: 3737

transmit RF signals wherein the signal includes among other information, positional information of the transponder (see col. 5, line 44- col. 6, line 43).

Ishiwawa et al.'448 do not disclose a plurality of field generators, but Ishiwawa et al.'448 states that interrogation generators are well known in the art (see col. 6, lines 30-43).

Therefore, it would have been obvious to one skilled in the art at the time that the invention was made to have used a number of generators in order to interrogate the position of the transponder.
